

# Income Assured Plus Premium Tables

Chart 1 shows the income protection based on the number of units selected.

- To work out a monthly premium take the amount of income protection required each week in the white column in chart 1.
- If exact amount not shown use the lower figure nearest to it.
- Look left and see how many units are needed. (The minimum level of cover available is 5 units). Now move to chart 2 if 'pure protection' is required or chart 3 if 'protection with investment' is required.

Chart 2 shows the cost per unit, per month according to the age attained in the current year for income protection cover only.

- Find the appropriate age band.
- Look for the selected deferred period or Day One cover column, this shows the cost per unit.
- Now multiply the cost per unit by the number of units required.

The monthly premiums shown in the tables are not level and will increase in the specified age bands as your clients get older. Age increases currently take effect on the 1st January on the basis of the age attained by your client in that year.

Chart 3 shows the cost per unit, per month according to the age attained in the current year for income protection with the option to accumulate a capital sum.

## Adding Day One Accident Cover

- To include Day One Accident Protection, 'which means that benefit will commence immediately should your client suffer an accident', add the following monthly cost to each unit according to the chosen deferred period.
